

**University of Missouri System  
Undergraduate Financial Aid Summary Report  
FY2011-FY2015**

(Metropolitan Fee Undergraduate Students)

Report Prepared by  
Dr. La Shonda Carter-Boone  
Senior Institutional Research Analyst

**University of Missouri System**  
**Undergraduate Financial Aid Summary Report**  
**FY2011-FY2015**  
**(Metropolitan Fee Undergraduates)**

**Executive Summary**

The Undergraduate Financial Aid Summary Report for Metropolitan Fee Undergraduates includes undergraduate financial aid distribution patterns for the University of Missouri System and the Kansas City and St. Louis campuses from fiscal year 2010-11 (FY11) through fiscal year 2014-15 (FY15). In the first part of this report nine questions are addressed at the UM System level:

1. How many students received aid and what type of aid was received?
2. Has grant aid kept pace with increases in tuition and required fees?
3. How has the distribution of institutional gift aid changed over the past five years?
4. How has the distribution of PLUS loans changed over the past five years?
5. What percent of tuition and required fees is met by grant aid?
6. How has the number of aid recipients with need changed by income level?
7. How do financial aid packages vary by income level?
8. For students that have need, what is the average amount of unmet financial need?
9. Can families afford to pay the expected family contribution?

The second part of the report provides campus-level financial aid distribution patterns for the past five years, which may differ from system-level findings.

**System-wide trends highlighted include:**

- x Total aid to students with need is awarded from a combination of aid based on merit and aid based on need. Over the past five years, there has been a 1.6% increase in the number of metropolitan fee financial aid recipients that have financial need. Although tuition and fees rose 10% over the past 5 years, the overall budgeted cost of attendance has decreased 12.5% (Figure 1.2). Subsequently, the number of metropolitan fee financial aid recipients with need has remained relatively steady with an increase of only 1.6%. (Figure 1.1).
- x The gap between tuition and required fees and the average grant aid awarded to undergraduates increased \$436 over the past five years (Figure 1.2).
- x The number of institutional grants awarded to metropolitan fee students based on need increased from 365 in FY11 to 604 in FY15. During the same time period there has been an increase in the number of merit awards given to students both with and without need (Table 1.1).
- x Metropolitan fee undergraduate students in the lower income categories have the highest grant aid as a percentage of tuition and required fees (Table 1.2).

- x The volume of Parent Loans for Undergraduate Students (PLUS loans) decreased for students with need and remained relatively stable for students without need from FY11 to FY15 (Table 1.4).
- x Students with incomes less than \$40,000 have the highest amount of financial need and receive larger total financial aid awards than higher income students. However, lower income students continue to have the largest amount of unmet financial need (Figure 1.4).
- x The unmet financial need of students decreased in all income categories over the past five years (Figure 1.5).

**Campus-specific variations from System trends:**

- x Since FY11 the St. Louis campus experienced a 17% increase in the total number of metropolitan fee undergraduate students with need along with a 24% decrease in the number of full pay/no aid students (Figure 3.1).
- x The gap between average grant aid and tuition and required fees increased nearly \$1,500 for metropolitan fee students at the Kansas City campus (Figure 2.2).

## **The contextual basis of financial aid distribution**

Foremost, a BUDGETED COST OF ATTENDANCE (COA) is determined for every student that completes a FAFSA. The COA varies by student and is based on factors such as residency status, load status (full or part-time), and living arrangements (on or off-campus). Next the amount that the family is expected to contribute to cover the COA is determined based on several factors, including the family's adjusted gross income. A student's financial need is determined by subtracting the EXPECTED FAMILY CONTRIBUTION from the budgeted COA. If the calculated value of FINANCIAL NEED is positive, the student is eligible to receive need-based ass

## **6. How has the number of aid recipients with need changed by income level?**

There has been a change in the number of aid recipients with need by income level. The number of aid recipients with need with income less than \$40,000 slightly decreased from FY11 to FY15. In addition, there has been a significant increase in the number of aid recipients with need with income between \$40,000 to \$80,000. Overall, the University continues to experience an increase in the number of higher-income students that require financial assistance to meet the cost of attendance (Figure 1.3).

## **7. How do financial aid packages vary by income level?**

Students with incomes less than \$40,000 have the highest amount of financial need and receive larger total financial aid awards than higher income students. However, by income level, there is a difference in the structure of the financial aid packages and the way that financial need is met. For example, loans cover a larger percent cost of attendance for lower income students than higher income students. Also, even though lower-income students receive the most grant aid, and take out the most loans, they continue to have the largest amount of unmet financial need (Figure 1.4 and Table 1.3).

## **8. For students that have need, what is the average amount of unmet financial need?**

Over the past five years, the unmet financial need of students at all income levels declined. However, students with income less than \$40k still have the largest amount of
