In such a case of receiving such prior written approval, the Inventor must provide the University with a copy of any such patent applications and any patent office correspondence regarding the patent application as set forth in Section D.2.a. The University's consent to file shall not constitute a waiver of or otherwise affect the University's ownership in the Invention.
- ii. When an Invention is owned by an Employee, the Inventor shall not further create, develop, or commercialize an Invention with Substantial Use of University Resources unless pursuant to a written agreement with the University executed by the President or his/her designee that sets forth the terms and conditions of such Substantial Use of University Resources. A term or condition of the written agreement may involve, for example, University ownership of the Invention, University/Inventor co-ownership of the Invention, or other revenue sharing with the University if such further creation, development, or commercialization of the Invention involves Substantial Use of University Resources. By way of example, if an Employee in the school of music files a patent application directed to a new engine that is not subject to University ownership under Section D.1.b, and the Employee is then desirous of obtaining federal funding through the University to build and test the new engine, the University and the Employee should enter into a written agreement which provides for University ownership of the patent application and Invention so that the University may satisfy its obligations to the federal government in accordance with the Bayh-Dole Act. The Substantial Use of University Resources should also be reported to the Conflict of Interest Committee and subject to a Management Plan in accordance with Collected Rule and Regulation 330.015.
 - g. Initiation of Non-Assertion of University Rights in Invention by

If the University makes a determination that an Invention is not "enabled" such that one skilled in the art can make and use the Invention without undue experimentation under U.S. Patent law or that the Invention Disclosure Form is premature or incomplete, then the University may, in its discretion, elect to (1) defer the waiver/retention-assignment process under this Section D.4 until such Invention is enabled or more mature/complete or (2) proceed with the waiver/retention-assignment process under this Section D.4.

For clarity, the distribution protocols outlined do not apply to personally owned Inventions and copyrightable materials but only to those Inventions and copyrightable materials owned by the University.

2. Department of Veteran's Affairs. In the case of Inventions made jointly by University Employee(s) and individual(s) employed by the United States Department of Veteran's Affairs, with or without compensation, the President or his/her designee may execute a written agreement with the United States Department of Veteran's Affairs which provides for different division, distribution and allocation of Gross Proceeds or Net Proceeds as provided herein.
3. Inventor Revenue Distribution Agreement . If more than one Inventor is to share in the Inventor Share provided in Section J.1 of these regulations, the Inventors entitled to receive payments should decide among themselves their respective shares and provide the TTO with a written agreement signed by all Inventors. This written agreement may be provided as part of the Invention Disclosure Form or may be a separate written agreement. Such written agreement among the Inventors should be provided promptly to the TTO after receiving a written request from the TTO for such an agreement, at a minimum, and the written agreement should be provided prior to distribution of the Net Proceeds. Any such written agreement will be irrevocable unless it is modified in writing by all Inventors. In the absence of a written agreement, the net proceeds shall be divided equally among the inventors.

For example, in order to qualify for the Inventor Share, an Employee must have executed any confirmatory assignments requested by the University and must reasonably assist the University with the University's efforts to commercialize the Invention (including but not limited to reasonable input on the filing, prosecution, and maintenance of any Patents or PVP certificates related thereto).

- b. In the event that an Inventor does not comply with these regulations (for example, the Inventor refuses to sign such a confirmatory assignment and/or does not provide such reasonable assistance to the University), no Inventor Share will be allocated to that Inventor and the Inventor Share shall be allocated to the other Inventors, and the corresponding Campus Share shall be likewise adjusted as if the non-cooperating Inventor did not exist.

K. Sanctions.

Conduct by an Employee that violates these regulations shall constitute a breach of the employment contract and may lead to disciplinary action. The Patent Committee may make a determination of a violation of this policy and will report such violation to the Chancellor. After the finding of a violation, the Chancellor of each campus may apply sanctions, including but not limited to, one or more of the following:

1. Letter of warning or admonishment,
2. Suspension or termination of research compliance committee approvals,
3. Suspension or termination of the privilege to submit sponsored activity proposals,
4. Suspension or termination of sponsored research activity spending authority,
5. Demotion or removal from assigned administrative roles,
6. Ineligibility for waivers/re-assignments,
7. Ineligibility to receive an Inventor Share,
8. Referral to campus Committee on Tenure or other appropriate committee for discipline or dismissal for cause of faculty,

It was moved by Curator Hoberock, seconded by Curator Brncic, that the following resolution be approved:

RESOLUTION

WHEREAS, the Board of Curators has the constitutional and statutory authority to govern the University; and

WHEREAS, the Board often delegates authority to other persons and groups to make decisions or provide advice, but it has not delegated its authority over university monuments and exterior spaces; and

WHEREAS, in July of 2020, a taskforce was formed to, among other things, provide advice in contextualizing the Thomas Jefferson statue located on Francis Quadrangle at the University of Missouri-Columbia (MU); and

WHEREAS, the Board believes that providing additional historical context to the statue aligns with and supports our mission to educate; and

WHEREAS, the task force reported that “[f]rom the first meeting, it became apparent that the charge to the taskforce was formidable, given the diversity of opinions held by the taskforce members and the number of histories that members thought needed to be acknowledged to fulfill the taskforce’s charge”; and

WHEREAS, the taskforce’s report and recommendation demonstrate the challenge of contextualizing Jefferson or the statue in a succinct, complete and objective manner with unanimous support from the taskforce itself; and

WHEREAS, the Board agrees with the taskforce that Jefferson is “a complex historical figure” and concludes, after careful consideration, that it is not possible to provide appropriate context for Jefferson’s personal accomplishments and shortcomings within the limitations of a wayward sign; and

WHEREAS, the Board agrees with the taskforce that a “QR code will allow further exploration of the details of all facets of Thomas Jefferson’s life by those who wish to pursue further information” and further believes this digital contextualization will help students, alumni, and visitors alike to appreciate the complexity of our great nation’s history; and

WHEREAS, an academic institution of higher learning has a core mission for advancing research and scholarly pursuits, the Board encourages historians to rigorously research and contextualize Thomas Jefferson and other historical figures through publications that will continue to add to our knowledge and understanding.

NOW, THEREFORE, BE IT RESOLVED,
